

MICT e-Gate

Truck Manifesting

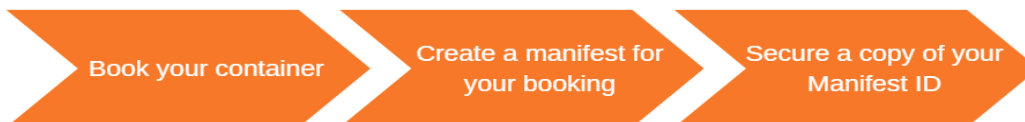

Truck Manifesting is a TABS feature that has the objective of simplifying and streamlining the gate process for truck drivers through the advance submission of booking details, truck plate number and driver information.

With its combined functionalities, TABS users can now have a more optimized experience in creating bookings as well as providing the ability to pre-check existing holds in your planned transaction to avoid disruptions during your gate processing.

Benefits of Truck Manifesting

-  **Advance booking for double transaction**
Automatically opens tandem slots for exports (laden and empty) through the "TBA" functionality to aid in double transaction bookings
-  **Truck Plate, Driver and Gatepass Validation**
Allows status checking of the truck plate number, driver's license and gate pass during the manifest process to flag any hold or impediment
-  **Driver SMS Alert System**
Receives an automated SMS notification whenever a container hold is lifted (i.e. X-Ray, DEA, BOC hold) to signify truck drivers that they can proceed to gate out
-  **Faster gate-in process**
Eventually eliminates manual verification and processing of transaction at the gates
