MICT *e-Gate* **>**

TRUCK MANIFESTING

TRUCK PLATE, DRIVER'S LICENSE AND GATEPASS VALIDATION

Pre-check your **truck plate number, driver's license and gatepass number** in Truck Manifesting to know if there is no "suspended/banned" or "hold" status in our system before entering the terminal.

After you input all these details, you can immediately identify if there is an error in any of these and what the error is about.

Your container should have a valid gatepass (updated storage and/or reefer payment).

The **TRUCK** and **DRIVER** should:

✓ have an **existing and updated record** in our system

✓ have an **existing PTO (Permit to Operate)** of its trucking company

✓ come from the **same trucking company**

✓ not have an **existing manifest in the same zone**

If you encounter an error in creating a manifest, click on the **ERROR** under the **STATUS** to know what the error is about

To make the details valid in the manifest, please cancel the existing manifest and create a new truck plate and/or driver details that are registered and without hold.

If gatepass is expired, a **red banner on top** will pop up.

Please settle the additional charge as stated in the error to continue using the gatepass number in your manifest.

REMINDER

Make sure to input the **correct and updated gatepass number, driver's license number or truck plate number** to successfully create a manifest.

For other questions and concern, please contact **customercare@ictsi.com.**
